

Understanding Demographics and World Population

A Euramerican National Assembly Presentation

Global Population Density

The height of the spikes relates to the number of people living in an area - roughly 2km x 2km

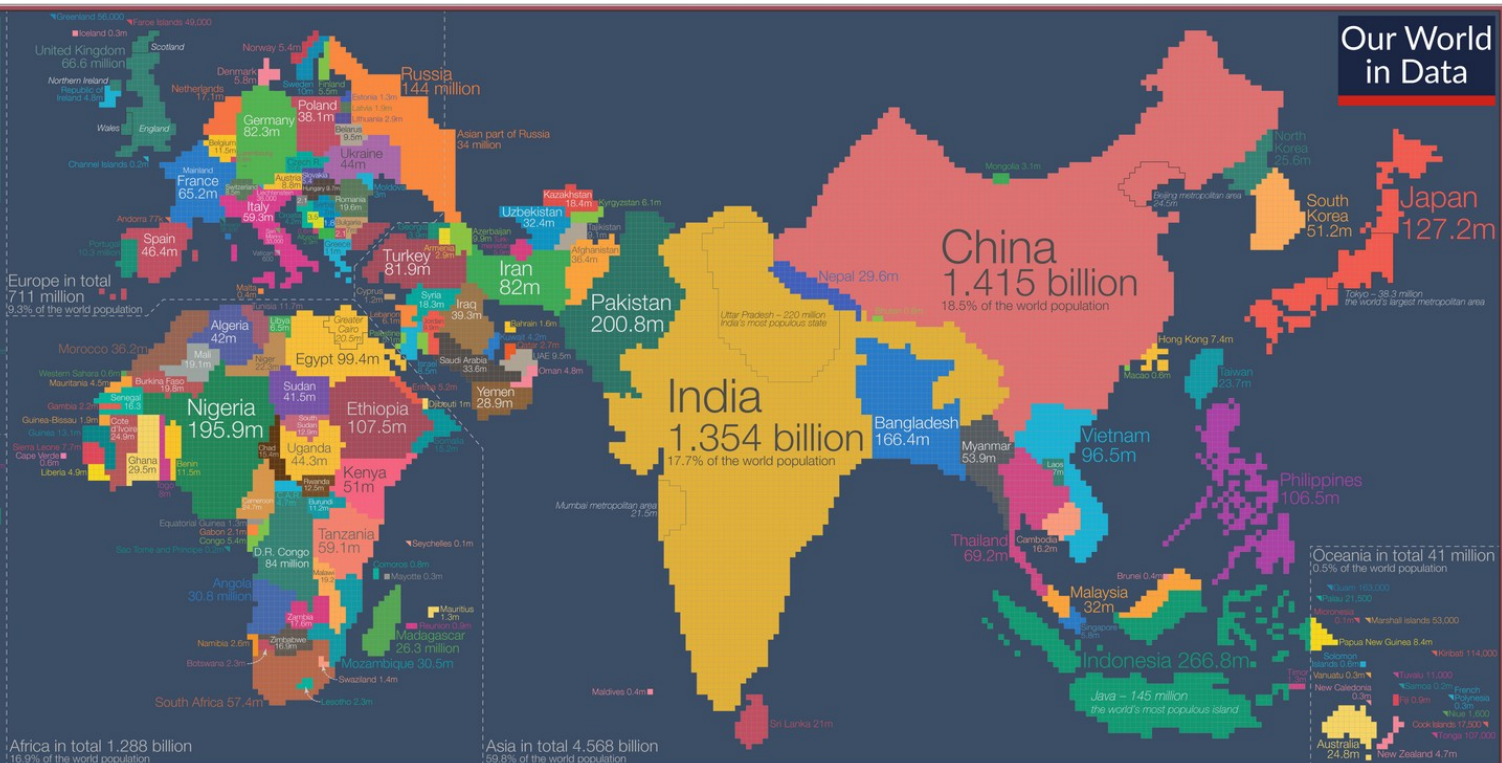

Data: GHS_POP, EU
Software: Aerialod
Author: Alasdair Rae

The country's size in this map represents the size of the population.
Each square [■] represents 500,000 people.
All 15,266 squares show where the world's 7.633 billion people live.

One Hundred Million Pennies

100,016,640

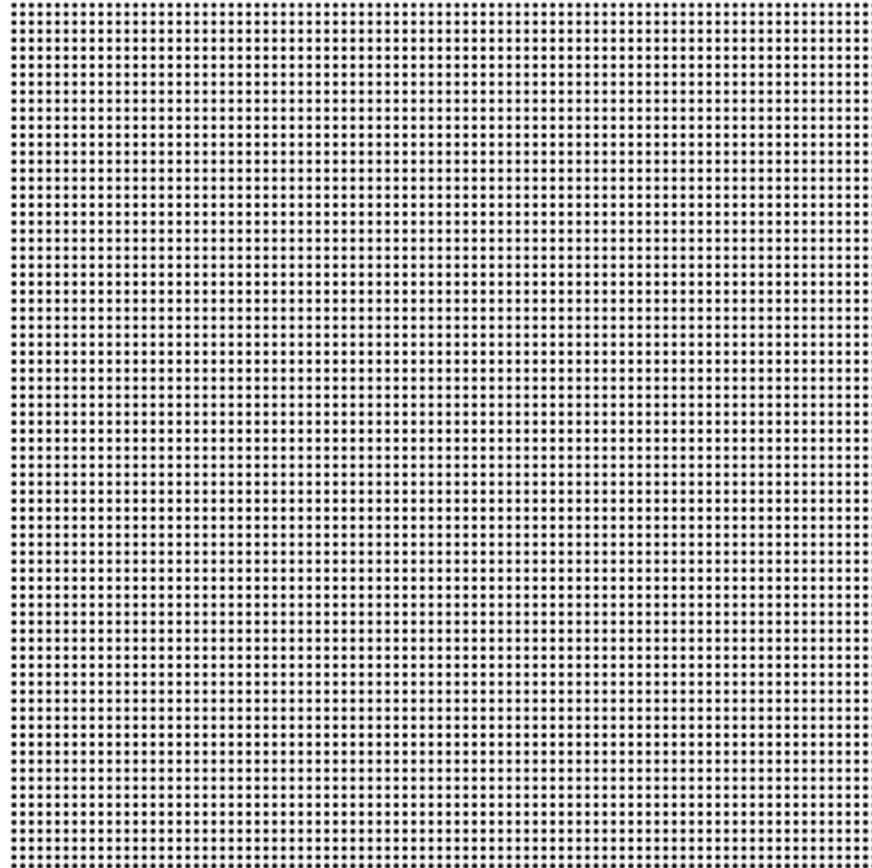

One hundred million, sixteen thousand, six hundred and forty Pennies
[Two cubes, one 12x12x12 feet, the other 7x7x7 feet]

Since these cubes are mostly dense metal, their weight is impressive. One hundred million pennies weighs over 300 tons. For comparison, the largest living animal, the [Blue Whale](#), weighs less than 150 tons as an adult.
